PAINT PROTECTION

Our products are designed to prevent your vehicles bodywork from being damaged by UV rays which can cause paint fade.

The unique production and design repels acidic rain, atmospheric pollution and damaging road salt.

UNCOATED

Dirt and pollutants can sit in paint pores

COATED

Dirt and pollutants cannot attack paint

Paint Protection bonds with the pores in your paintwork, alloys, bumpers and glass* leaving a smooth, high gloss finish. Protect your vehicle from tree sap, traffic pollutants, strong car wash chemicals and everyday weathering including UV light and frost.

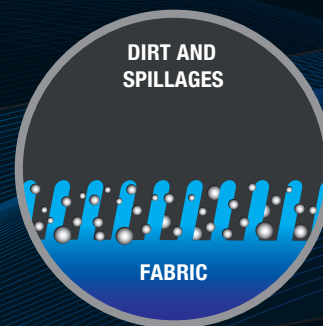

- UV protection
- Acidic/alkaline rain repellent
- Mud and dirt protector
- Bird dropping protection

FABRIC PROTECTION

Fabric Protection covers each fibre with a film, protecting interior fabrics from spillages and everyday stains.

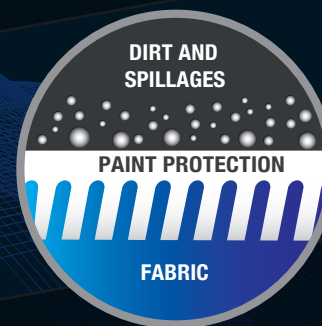

This film resists soaking from hot and cold drinks, food particles, mud and dirt, allowing treated surfaces to be wiped clean.

UNTREATED

Untreated Fabric/Carpet

TREATED

Treated Fabric/Carpet

- Protects against dirt ingress
- Drink spills
- Pet stains

Paint Protection comes with a lifetime guarantee for the period of your ownership of your car.

**Not suitable for front or rear windscreens.*
